DETAILED ACTION

1. This office action is in response to Applicant's after-final amendment filed on 10/14/2004. Claims 1, 10 and 19 have been cancelled. Claims 2, 5, 11, 14 and 20-30 have been amended. Claims 2-9, 11-18 and 20-30 are pending.

Allowable Subject Matter

2. Claims 2-9, 11-18 and 20-30 are allowed.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to method and apparatus to provide encryption and authentication of a mini-packet in a multiplexed real time protocol (RTP) payload. Padding is added to mini-packets when the mini-packets are encrypted to insure each mini-packet is an integral multiple of a predetermined block size. The closest prior art, Bharucha et al. (U.S. Patent No. 6,229,821) and Schulzrinne et al. (Network Working Group, "RTP: A Transport Protocol for Real-Time Applications") fails to teach the padding is for each mini-packet is determined according to: $p=n-k*\text{floor}((n-1)/k)$, wherein p is the amount of padding added to each mini-packet, n is the actual data size, and k is the block size. The cited prior art, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
